

Sodagum Venkata Kaushik

Google Student Ambassador @Christ University | MCA Student at Christ University | Passionate about cybersecurity & AI

Bengaluru, India | svkaushik2210@gmail.com | portfolio-general-ten.vercel.app | github.com/Kaushik2210 | linkedin.com/in/sodagum-venkata-kaushik

EDUCATION

Master of Computer Applications (MCA), Information Technology Christ University, Bangalore	May 2026 – May 2028
BCA, Computer Science St Joseph's University	Jun 2023 – May 2026

EXPERIENCE AND LEADERSHIP

Google Student Ambassador Google · Bengaluru, Karnataka, India (Remote) Internship with Google. Skills listed: leadership and product marketing.	Apr 2026 – Sep 2026
Google Student Ambassador Google · St Joseph's University (Hybrid) Conducted tech sessions and hackathons, promoting Google tools and helping students bring technology into their academics.	Aug 2025 – Jan 2026
Head of Information Technology, Cybernetics Association St Joseph's University · India (On-site) Organised cybersecurity and IT workshops, coordinated teams and encouraged innovation. Also General Secretary of the association.	Apr 2024 – Mar 2025
President, Sanskrit Association St Joseph's University · India (On-site) Promoted Sanskrit language and culture through workshops and events.	Apr 2024 – Mar 2025

SELECTED PROJECTS

Overrank A live house-competition platform for campuses with a leaderboard that reacts in real time. Next.js 16 · TypeScript (strict) · Supabase · Tailwind CSS · Framer Motion	overrank.vercel.app
AlgoVerse A DSA visualisation and interview-prep platform with a real step-through debugger for every algorithm. Next.js 16 · TypeScript (strict) · Tailwind CSS v4 · Supabase · Zustand	algoverse-lovat-seven.vercel.app
Orbital Sentinel Was that spacecraft anomaly a broken sensor, a solar storm, a failing bearing, or an attack? Python · FastAPI · PyTorch · ONNX · Next.js	web-production-ddd02.up.railway.app
VeriFrame Deepfake detection that reports a calibrated probability and the evidence, never a bare verdict. Python · PyTorch · FastAPI · Next.js · TypeScript	github.com/Kaushik2210/Deepfake-Detector
PORTCULLIS A prompt-injection detection gateway for LLM apps. Think WAF, but the payloads are natural language. Python · Gateway + dashboard · GitHub Actions CI	github.com/Kaushik2210/PORTCULLIS
ATTESTA An autonomous SOC where every verdict is reproducible and re-adjudicable. TypeScript · Multi-tenant platform · LLM reasoning layer	github.com/Kaushik2210/ATTESTA---AI-powered-SOC-

NetSentinel

github.com/Kaushik2210/Net-Sentinel

An explainable network digital twin for threat detection and attack reconstruction.

Python · MITRE ATT&CK · Zeek / Suricata inputs

gitVisualise

kaushik2210.github.io/gitVisualise

Paste a GitHub link, get an interactive, narrated architecture tour of the repo.

JavaScript · Node.js · GitHub Actions · GitHub Pages — Creator and main author (85 of 104 commits on GitHub).

GLYPHFORGE

glyphforge-web.vercel.app

A GPU-native ASCII art engine that matches glyph shapes instead of using a brightness ramp.

TypeScript · WebGL · React · Canvas

SKILLS (EVIDENCED BY THE PROJECTS ABOVE)

Software TypeScript, JavaScript, Java, Next.js, React, Node.js, Tailwind CSS, Supabase / PostgreSQL, FastAPI, GitHub Actions CI

Data Python, Time-series anomaly detection, Telemetry analysis, Data visualization

AI PyTorch, ONNX, Computer vision, LLM application design, Explainable detection

CERTIFICATIONS

- Pre Security Certificate — TryHackMe, Jun 2026
- IBM Cybersecurity Analyst Specialization — IBM, Oct 2025
- Cybersecurity Job Search, Resume, and Interview Prep — IBM, Oct 2025
- Generative AI: Boost Your Cybersecurity Career — IBM, Oct 2025
- Cybersecurity Case Studies and Capstone Project — IBM, Oct 2025
- Incident Response and Digital Forensics — IBM, Sep 2025
- Penetration Testing, Threat Hunting, and Cryptography — IBM, Sep 2025
- Cybersecurity Compliance Framework, Standards & Regulations — IBM, Sep 2025
- AWS Academy Graduate - AWS Academy Cloud Foundations — Amazon Web Services (AWS), Aug 2025
